To Whom It May Concern:

We recently completed a remodel of our kitchen, powder room and floors in five rooms. The work was done by Derrick and Danielle Crossland of Crossland Construction. The kitchen and powder room were completely gutted down to the studs and rebuilt.

We found the Crosslands to be wonderful to work with, extremely competent and diligent. They showed up on time every day and the job was completed in about 6 weeks, just as we were told it would be. While they were not the least expensive of the bids we got, I'm convinced the results were the best we could ever have hoped for.

Derrick not only is a perfectionist and a professional in every way, but he also provided excellent advice that we would probably have needed a designer for. He did the complete lighting plan. We were skeptical at first, but we have received many complements on the lighting. It is very utilitarian but dramatic enough to showcase the kitchen elements we want to emphasize without looking ostentatious. He also provided great suggestions for changing the powder room configuration to accommodate a countertop basin with a faucet that comes out of a mirrored wall. He also suggested the design we used for the tiles on the backsplash and around the mirror.

I highly recommend Derrick and Danielle and would not hesitate to turn any construction job over to them. They are trustworthy and could be left alone to enter and lock up our home. We would be happy to show off the job to his prospective customers. Feel free to give me a call.

Sincerely,

Alan Seiver
